Creating sustainable foundations for Smart City deployments

The Connected City Advisory Board (CCAB) develops, shares and promotes thought-leadership and practical framework for the social and economic development and sustainable operation of the Connected City ecosystem.

It's a unique platform for City Managers and CIOs to knowledge-share challenges and opportunities in the development and execution of Smart Cities, establish best practice and determine a strategy to leverage public-private partnerships.

This invitation-only CCAB group encompasses representatives from major governmental and industry associations that are involved in Connected and Smart City development.

Join us NOW!

"**Cities must work together on a global basis to develop a connectivity blueprint framework for developing smart cities.**"

Shrikant Shenwai
CEO
Wireless Broadband Alliance

5 City CIO networking

1 Development of **Connected City plans and Blue prints**

OUR GOALS

4 Create an environment for City Managers and CIOs to **Knowledge Share**

2 Recognize and disseminate information about the **Best Practices**

3 Public Private Partnerships

WHO SHOULD PARTICIPATE?
The membership of the Connected City Advisory Board (CCAB) consists of a select group of City CIOs and senior city and government officials along with invited industry experts and members of the WBA Board directors.

CONNECTED CITY
Advisory Board

Connected City Charter

Internet connectivity, at its core, is a civilization changer on the same level as roadways, water systems and electric grids. It is redefining the way people interact with the world, access and share information, and improving the way we live work and play.

It's a universal, global need that supersedes economic status, language and location. Having a global connectivity infrastructure provides the real potential to transform civilization forever

Build awareness, advocacy and global availability of Connectivity guided by the leadership of Connected Cities. These Cities will guide and mobilize the industry through the adoption of standards and best practices as defined by the shared knowledge of the Connected Cities Advisory Board (CCAB).

Guiding Principles

Address and reduce the digital divide and ensure digital equality through accessible and universal Internet Connectivity

Improve the quality of life of residents through hyper-connected and digital-first cities leadership

Establish and grow Smart Cities partnerships to increase shared knowledge and inform decision making

Objectives

Make Connectivity more available, secure and universal to all citizens

Champion the benefits of a Connected City

Foster the development of state-of-the-art Connectivity infrastructures in Cities

Build and grow a robust network of Connected Cities

Benefits

Access to collaboration, networking and knowledge sharing opportunities

Connected Cities guidance documents, reports and research

Focused representation and industry advocacy

Outcomes

Best practices, guidelines, roadmaps, white papers and recommendations

Market research, surveys, indexes, trials/tests and showcases

Virtual platform for networking and knowledge sharing

Partnerships/business models (Public <-> Private) and monetization opportunities

Building on the recent thought-leadership dialogue and roundtable discussions hosted by WBA with CIOs and senior officials from leading cities including New York, San Francisco, Barcelona, London, San Jose Dublin, Delhi, Mexico City, Calgary and Singapore the Connected City Advisory Board will continue to discuss the development of the Connected City plans, the creation of public private ecosystems and collaboration mechanisms for resource contributions.

Connected City Advisory Board has released the first whitepaper, outlining the status of City Wi-Fi around the world.

The whitepaper reveals that activity in wireless is at an unprecedented level as cities seek expert assistance to deploy the technology; with over 75% of respondents saying they have plans in place to significantly increase investment in Wi-Fi.

City Wi-Fi
Status Report
October 2015

CONNECTED CITY
Advisory Board

"At the end of the day, every City is different, but they all face very similar challenges"

Mr. Vijay Sammeta, Chief Information Officer, City of San Jose

"All type of applications are currently being designed around the robust Wi-Fi network the City is building"

Mr. Hock-Yun Khoong, Assistant CEO and Chief Data Officer at Infocomm Development Authority of Singapore

"Wi-Fi is very important to our Connected City – absolutely essential in regards to IoT, sensors, traffic cameras, video, and of course, keeping our citizens connected"

Mr. Paco Rodriguez, Smart Cities and Telecommunications Director, Barcelona City Council

"We're only just starting to see how Wi-Fi can fit into our emerging "Smart Dublin" strategy, and through various conversation with WBA and the CCAB members, it's becoming more and more clear"

Mr. Jamie Cudden, Smart City Manager and Policy Advisor, Dublin City Council

"We're pushing Wi-Fi as an enabling technology that can improve operations for business"

Mr. Alphonso Jenkins, Deputy Commissioner, Telecom Planning of New York City
